John Concannon, DO, FAAP

Colleen C. Vitale, MD, FAAP

Our 2017-2018 Flu Vaccine Clinic Information

The Federal health authorities have recommended yearly flu vaccines for all persons over the age of 6 months. The annual flu vaccine is **SAFE, EFFECTIVE, and NECESSARY for ALL**. Both Drs. Concannon & Vitale **ABSOLUTELY recommend the flu vaccine for all of their patients over 6 months** as well. Know that each of us, our families (children, too), and all of our staff have also received the annual flu vaccine in order to protect ourselves...and your children.

We will be operating our annual flu immunization clinics throughout this fall on selected afternoons, especially Tuesdays and Thursdays. **ONLY the Flu shot will be given this year as the old FluMist nasal spray was found to be less effective and is no longer available.**

Due to the large number of patients to be given the vaccine, please understand that **NO other exams or problem discussions can be performed** during these special flu immunization ONLY clinics. Please call our office at **943-7337** to schedule a slot in the Flu Clinic.

Patients over the age of 3 may be given this vaccine by our Medical Assistant, Marianela.

Children less than 3 years old or patients with chronic conditions **should be given an appointment during regular office hours** for their flu shot **by the doctor**. During these visits a brief medical exam will be conducted and any applicable **visit co-pays will be charged** as required. Please call our office at **943-7337** to schedule an appointment.

Note that if your child is less than 9 years of age and has NEVER received a flu vaccine before, they should receive two doses this year, one month apart. Those people who are **truly** allergic to eggs should receive their flu immunization by their allergist.

For parents and other household members, it is essential that they receive their flu vaccines as well. Flu vaccines will be available through your doctor, some public clinics, and at neighborhood pharmacies such as CVS, Walgreens, RiteAid, etc.
